My works:

Travel app

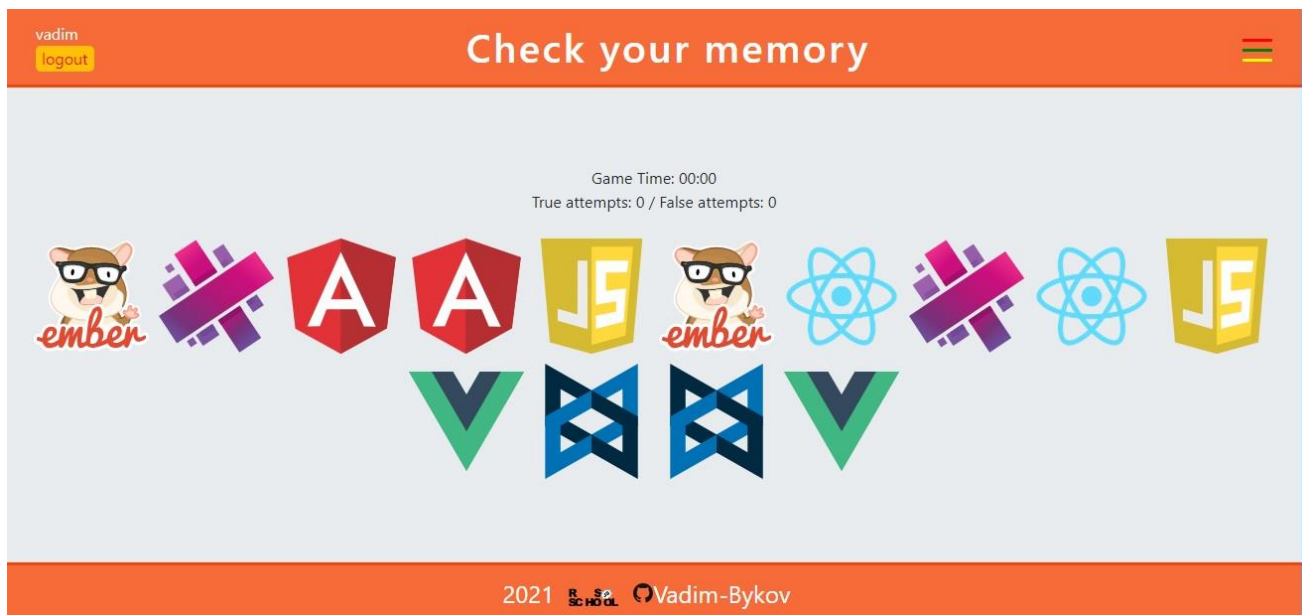

React (TypeScript) Application with information for tourists

Task: <https://github.com/rolling-scopes-school/tasks/blob/master/tasks/react/travel-app.md>

Deploy: <https://vadim-bykov.github.io/travel-app/>

React game

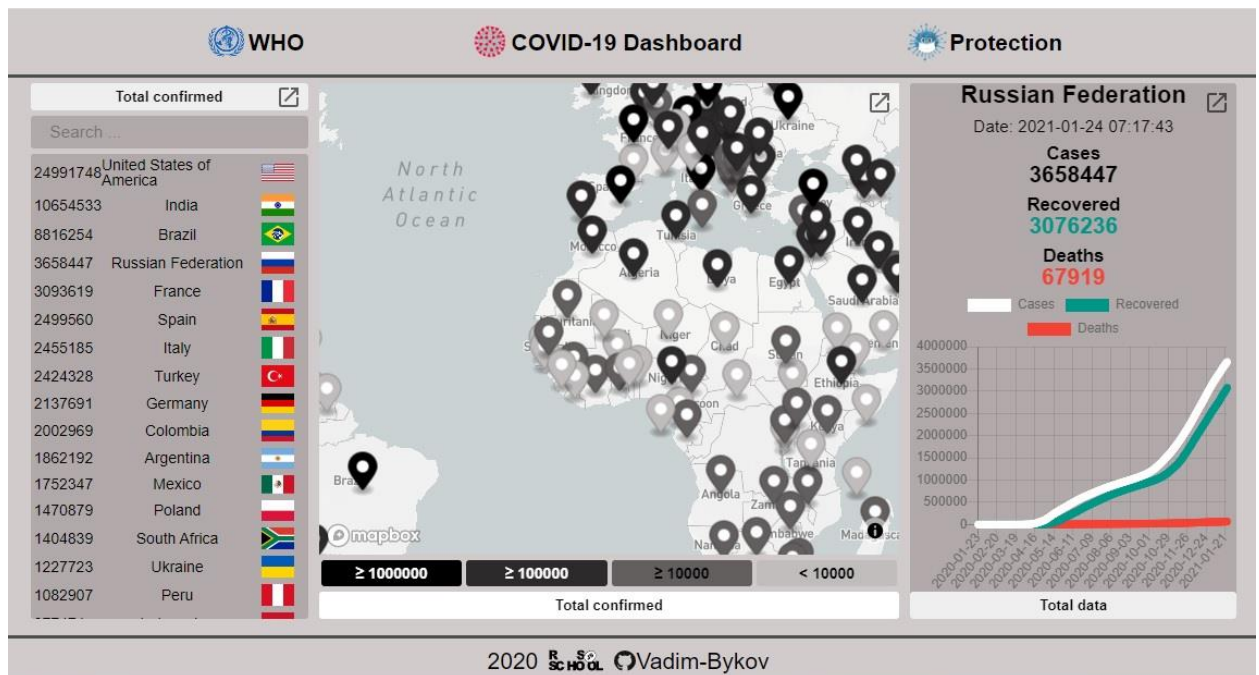

React application to check your memory

Task: <https://github.com/rolling-scopes-school/tasks/blob/master/tasks/react/react-game.md>

Deploy: <https://vadim-bykov.github.io/react-game/>

COVID-19 Dashboard

Application for tracking the spread of COVID-19 in the world and in selected countries

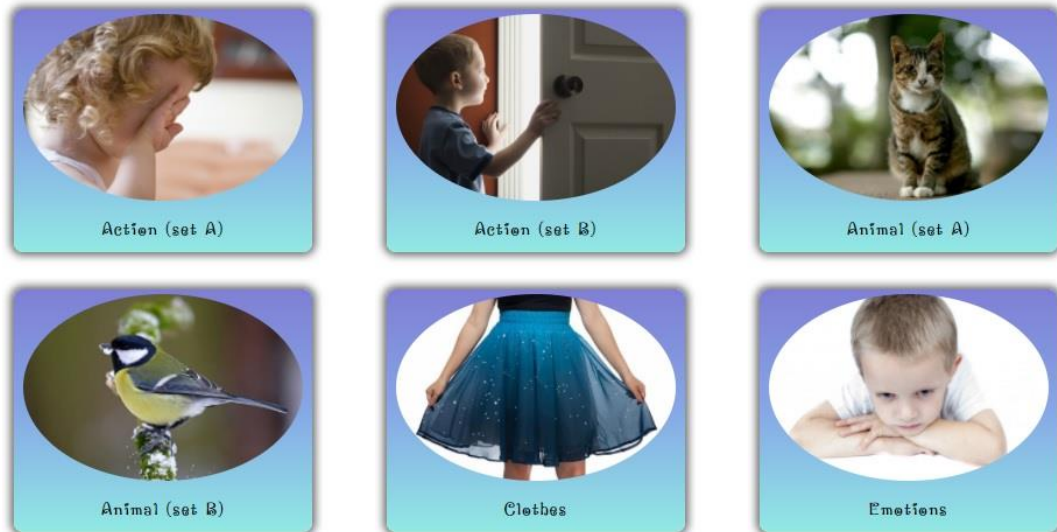

Task: <https://github.com/rolling-scopes-school/tasks/blob/master/tasks/covid-dashboard.md>

Deploy: <https://rolling-scopes-school.github.io/vadim-bykov-JS2020Q3/covid-dashboard/dist/index.html>

English for kids

Main page

English learning app for kids

Task: <https://github.com/rolling-scopes-school/tasks/blob/master/tasks/rslang/english-for-kids.md>

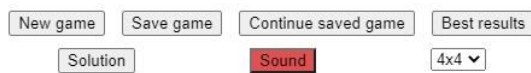

Deploy: <https://rolling-scopes-school.github.io/vadim-bykov-JS2020Q3/english-for-kids/>

Gem-puzzle

Moves: 70

00:08

The goal of the game is to move the tiles around the box to arrange them by numbers.

Task: <https://github.com/rolling-scopes-school/tasks/blob/master/tasks/gem-puzzle/codejam-the-gem-puzzle.md>

Deploy: <https://rolling-scopes-school.github.io/vadim-bykov-JS2020Q3/gem-puzzle/dist/index.html>

Virtual keyboard

Click here

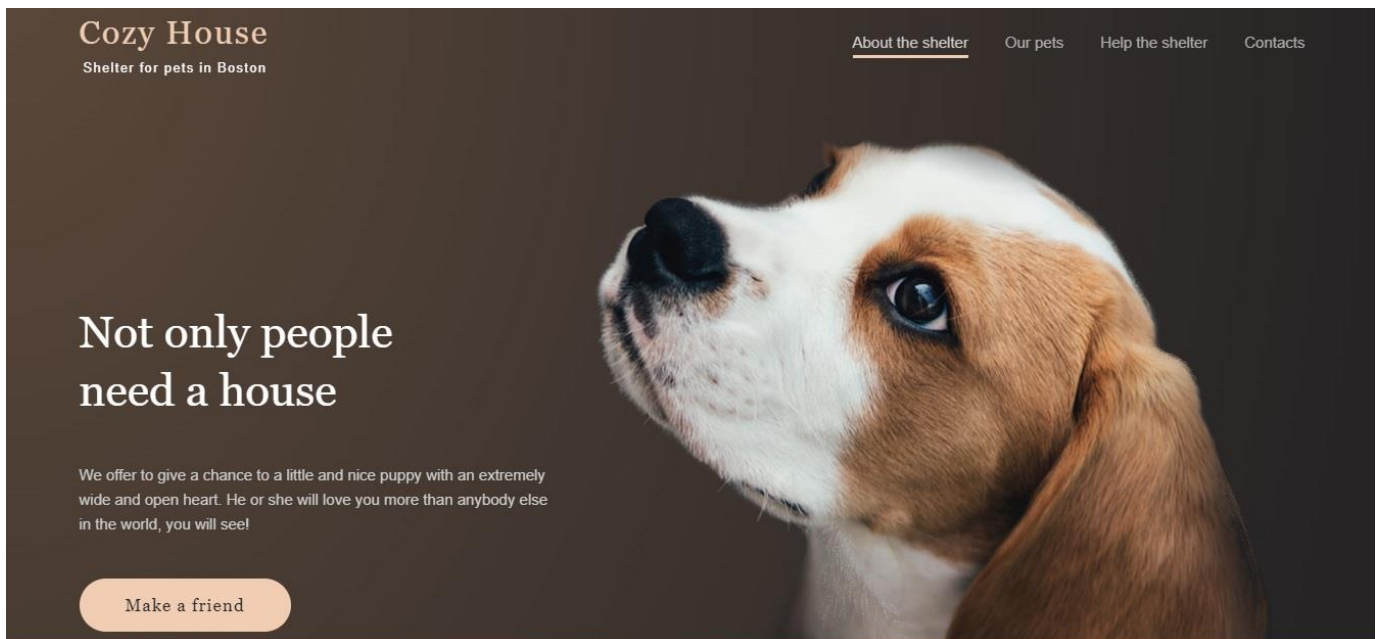

A project to create a multifunctional virtual keyboard.

Task: <https://github.com/rolling-scopes-school/tasks/blob/master/tasks/ready-projects/virtual-keyboard.md>

Deploy: <https://rolling-scopes-school.github.io/vadim-bykov-JS2020Q3/virtual-keyboard/>

Shelter

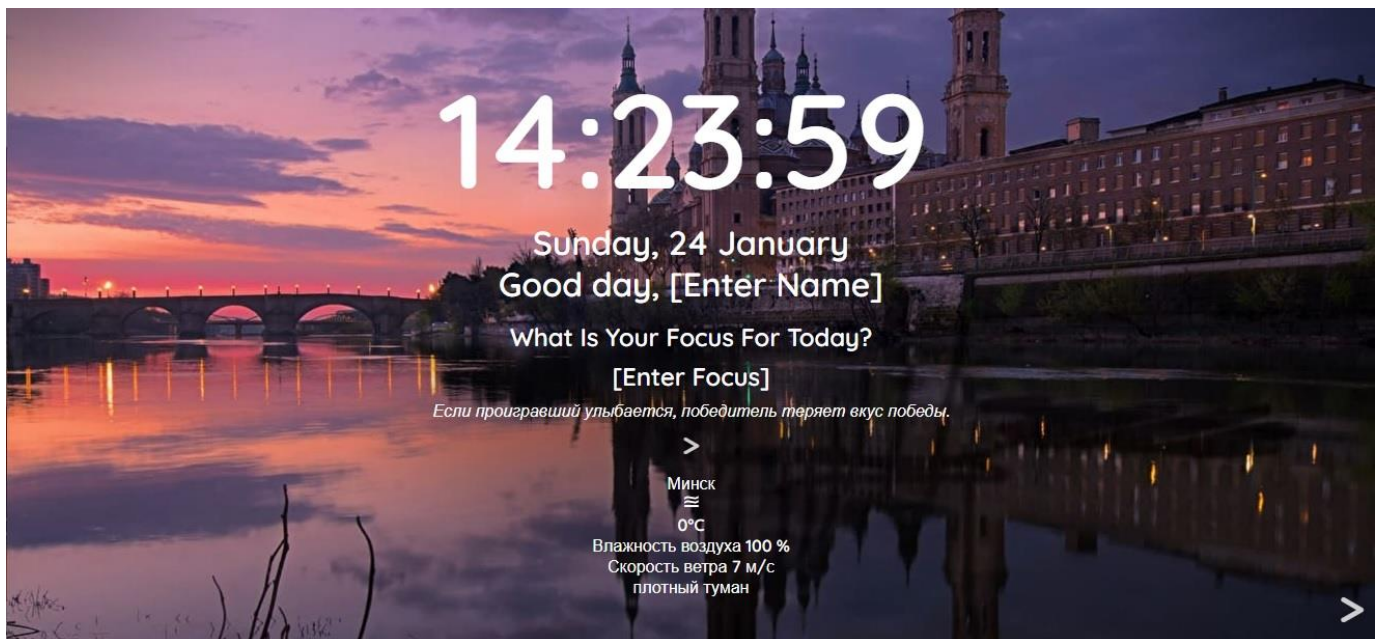

The task of creating a page according to the layout. There are burger menu, slider, popup.

Task: <https://github.com/rolling-scopes-school/tasks/blob/master/tasks/markups/level-2/shelter/shelter-DOM-ru.md>

Deploy: <https://rolling-scopes-school.github.io/vadim-bykov-JS2020Q3/shelter/pages/main/main.html>

Momentum

Momentum is an analogue of the app of the same name in the Chrome web store. The application shows the time and username, his goal for the current day. The background image changes depending on the time of day. The application uses local storage to store data.

Task: <https://github.com/rolling-scopes-school/tasks/blob/master/tasks/ready-projects/momentum.md>

Deploy: <https://rolling-scopes-school.github.io/vadim-bykov-JS2020Q3/momentum/>

Calculator

AC	DEL	√	/
1	2	3	*
4	5	6	+
7	8	9	-
.	0	^	=

Calculator is my first project where I started working with JavaScript.

Task: <https://github.com/rolling-scopes-school/tasks/blob/master/tasks/ready-projects/calculator.md>

Deploy: <https://rolling-scopes-school.github.io/vadim-bykov-JS2020Q3/calculator/>
